Working Student* Data Science

 Heidelberg / Hamburg  From now on

*We focus on talent, not gender

Your profile

- Excellent grades in data/web science, computer science, business computer science or comparable studies
- Good command of German and English
- Desire and time to support our team for at least 14 hours/week

What we are looking for

- Solid basic knowledge of methods and tools used in data science
- Experience in at least one of the following programming languages: Python, R or Java
- Ability to handle large volumes of data and work with databases
- Creative approach to the increasingly complex business and IT environment

What we offer

- Future-oriented work using the latest technologies in exciting and international customer projects
- Possible core areas: Natural Language Processing, Predictive Analytics or Computer Vision
- Innovative working environment with a strong team spirit
- Mentoring, coaching and knowledge transfer as well as the opportunity to assume responsibility quickly
- Agile working methods, flexible working hours and the opportunity to select projects according to individual interests
- Flat hierarchies and fast processes
- Wide range of opportunities for further development

Sounds interesting?

We are looking forward to receiving your application to
