# Junior Software Developer\* Backend Node.js

 Heidelberg / Hamburg  As of now

\*We focus on talent, not gender

## Your profile

- University degree in computer science, business computer science or a comparable degree
- Keen interest in web technologies and scalable back-end systems
- Good command of German and English
- Desire and time to support our team with immediate effect

## What we are looking for

- Knowledge of JavaScript/TypeScript, Node.js, NestJS, relational databases (e.g. MySQL) and NoSQL databases (e.g. MongoDB)
- Enthusiasm for distributed systems and RESTful APIs
- Experience in the development of scalable applications (PaaS/SaaS Cloud)
- Keen interest in the latest trends in software engineering (microservices, cloud architectures, Docker, Kubernetes)

## What we offer

- Part of a heterogeneous software development unit which handles hybrid web application projects
- Development of robust backends and lightweight middlewares, mostly based on Node.js and TypeScript
- Realization of projects via a design driven approach using agile methodologies
- The opportunity to work with the latest technologies in exciting customer projects
- Innovative working environment with a strong team spirit
- Mentoring, coaching and knowledge transfer
- Flat hierarchies and fast processes
- Plenty of scope for further development depending on your interests and talents

## Sounds interesting?

We are looking forward to receiving your application to
